It is a reflective, delicate and intensely conditioning treatment. Enhances the creativity of the hairdresser with the possibility of creating infinite color combinations, from the most intense, vibrant and ultra bright to pastel colors. Keeps hair healthy, nourished and extremely soft!

Directions for use: mix the two products in a bowl in variable proportions depending on the desired result. Mix them until you get a creamy mixture. Leave on for 3 to 5 minutes depending on the type of hair to be treated. Rinse thoroughly.

To obtain a more lasting result: after the first five-minutes exposure time, massage the product again to facilitate further absorption and extend the exposure time by another five minutes.

The combinations proposed in this color chart are only part of the infinite achievable. The images are indicative of the result that can be obtained, which may vary according to the base of application and length of exposure.

For an average head 10/15 g of mixture will be needed regardless of the combination chosen.
