WHAT IS TERMIX EVOLUTION?

It is the 1st range of hairbrushes adapted to each hair type, introducing us to the world of intelligent brushing. Its formula and latest innovations are a new methodology of work aimed at professional comfort and to protect the capillary density of hair.

SOFT · FINE HAIR

Designed to prevent hair breakage and worsening of the hair shaft due to its cross-system of ionized nylon bristles of thin diameter and beige colored microfilaments.

This system allows a better grip without damaging hair and providing an effect of increased capillary density.

BASIC · MEDIUM HAIR

Designed to control dehydration problems presented by this type of hair by combining the design of its tube and the amount and specific thickness of the ionized nylon fibers.

PLUS · THICK HAIR

Designed to help control and style this type of hair, thanks to the density of its ionized nylon fibers.

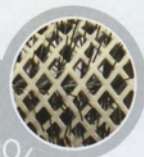

These bristles are more resistant than the ones found in other brushes, thus reducing the load force that occurs when it comes to dry this type of hair.

WHY IS IT SPECIAL?

27%
MORE
BRIGHTNESS

New and innovative diamond-shaped vents that increase by 10% the amount of air flow during the drying process.

30%
FASTER
DRYING

Perfect result and long-lasting hairstyles with less attempts and reducing wrist strain when working for a more healthy hair.

43%
