

Termix Brushes Information

Termix XL range –

These professional thermal brushes bring innovation to the salon, giving more surface area along with a special diamond vented system, which rapidly reduces the drying time by 30%, and also allows effortless styling. The coating can resist temperatures of up to 300°C!

Specifications:

- Comfortable grip handles
- Brushes are bonded not glued which gives bonus strength
- Non-stick nature of the brush prevents hair products adhering to the brush
- Polytetrafluoroethylene coating
- Available in sizes 17mm, 23mm, 28mm, 32mm and 43mm

Termix Soft range –

The cross-system of thin ionised nylon bristles and micro-filaments allow the brush to get a good grip, without causing any damage to hair. This collection of brushes has a temperature-resistant coating which advances heat diffusion, alongside the diamond vented system that creates more surface area to rapidly reduce drying time by 30% and allow effortless styling!

Specifications:

- Comfortable grip handles
- Brushes are bonded not glued which gives bonus strength
- Non-stick nature of the brush prevents hair products adhering to the brush
- Polytetrafluoroethylene coating
- Ceramic cream barrels to distinguish between the Evolution Basic (silver) or Evolution Plus (black) to make sure you pick the correct brush for your client's hair, every time.
- Available in sizes 12mm, 17mm, 23mm, 28mm, 32mm, 37mm, 43mm and 60mm
